iHome

INTRODUCTION

iHome was launched in 2005 to form a complementary synergy with Apple & its product lines, specifically starting with the iPod. In just its first year, iHome became the #1 brand in the iPod Electronics market and its iPod Clock Radio became and continues to be the #1 selling iPod accessory in North America.

As a result of its unprecedented success, iHome now offers a broad range of accessories for all of Apples devices. Our categories grew from audio to include cases, Bluetooth connectivity, a comprehensive connectivity line, and a full assortment of portable power to keep you going throughout the day.

iHome supports its brand with national television, print, online and outdoor advertising campaigns, and has garnered several industry awards for its unique products and advanced technologies. iHome's products can be found worldwide through virtually every distribution network in over 70 countries.

Our mission: to provide products designed to fit your lifestyle and built to last.

CONNECTIVITY

No matter what way you need to connect to your device whether charging or syncing, in your car, or in your home, we have taken care of everything you can think of to make sure that you and your phone stay connected.
